ATM Express offers a money-saving, communication solution for any dial-up ATM

Technology has enabled ATM Express to offer a cost-effective, faster means of communication for ATM's. Try out wireless communication or communication via high-speed internet today! Call now for more information: 877-271-2627.

Wireless Communication Solution Meeting the needs of today's ATM's

Why Wireless Communication?

-  Immediate deployment-no waiting on phone line installation
-  No circuit installation charges
-  Increased mobility
-  Improvements in transaction speeds
-  Eliminate dedicated dial lines
-  Reduction in recurring phone line costs
-  Continuing to use existing ATM equipment
-  No need to retrain employees on new equipment
-  Quick and easy to install-No LEC lines, No extended D-Marc required
-  Seamless installation to existing systems and equipment

ATM Express Wireless Providers

ATM Express has partnered with CDMA & GSM Networks to offer growing, secure communication capabilities for wireless ATM's:

Check for Wireless Coverage in Your Area with Wireless Coverage Maps

Verizon Coverage (copy & paste the URL below into your browser to access):

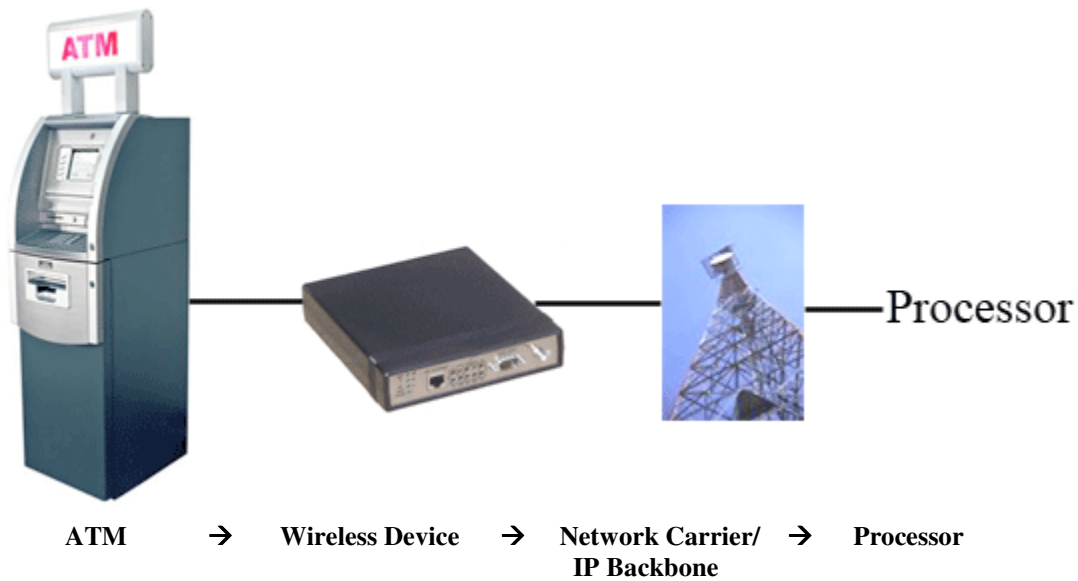

<http://www.verizonwireless.com/b2c/CoverageLocatorController?requesttype=newsearch>

(Enter location information, choose "NationalAccess & Enhanced Services," and click "Display Map.")

Cingular Coverage (copy & paste the URL below into your browser to access):
